Confluence
Figma
Postman
JMeter

EDUCATION

2013 - 2016

Bachelor in Management
WSB University

EXPERIENCE

January 2023 - present

Web Developer at **Massive Pixel Creation**

Currently I am actively involved in a solo project where I have harnessed the power of React and Next.js to create a cutting-edge, high-performance, and scalable web application. Despite having the backend provided by our client, I actively participated in the redesign of the API structure and proposed numerous enhancements to optimize functionality and user experience.

Sometimes I am jumping into other jobs, utilizing my PHP knowledge to address client issues with their WordPress websites. Successfully resolving bugs, developing custom plugins or simply maintaining existing websites.

September 2022 - December 2022

Quality Assurance Engineer at **Massive Pixel Creation**

I played a pivotal role in ensuring the quality and reliability of web applications. My responsibilities included thorough testing, test script creation, and close collaboration with the development team.

July 2022 - September 2022

Frontend Developer (internship) at **Wirtualna Polska**

I actively contributed to the development of new features, maintenance of existing code, and bug fixing. My role primarily focused on enhancing the user experience.

April 2022 - August 2022

Junior React Developer at **Techbees.io**

I gained hands-on experience in developing new features and creating reusable, clean components. My work primarily involved leveraging React, TypeScript, Redux, Material-UI, and Next.js to build [Coraz Zdrowiej](#) platform together with teammates.
